Portfolio

CAREER OBJECTIVE

Results-driven Full-Stack Developer specializing in React.js + Node.js ecosystems, with 1+ years of experience building production-grade web platforms. Expert in designing secure RESTful APIs, implementing JWT + RBAC authentication, and optimizing MySQL schemas for high-traffic applications. Proven ability to deliver scalable solutions that improve system performance by 40-50% and accelerate feature delivery in fast-paced environments.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), Python, C, C++
- **Frontend:** React.js, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend & APIs:** Node.js, Express.js, RESTful Architecture, JWT Authentication, Role-Based Access Control (RBAC)
- **Databases:** MySQL, SQLite, Schema Design, Query Optimization, Migrations
- **Cloud & DevOps:** DigitalOcean Spaces, Redis, Bull Queue, CI/CD Pipelines, Linux
- **Security & Utilities:** Helmet, bcrypt, Multer, Nodemailer, Postman, Git/GitHub, VS Code, MySQL Workbench

PROFESSIONAL EXPERIENCE

Full-Stack Developer

April 2026 – Present

Triosys Technosol

Hyderabad, India

- Architected and maintain high-performance full-stack applications using React.js, Node.js, Express.js, and MySQL, serving production traffic with 99.5%+ uptime.
- Spearheaded development of 2+ corporate websites and 2+ full-featured hackathon platforms, integrating automated career portals, dynamic workshops, training certifications, and campus registration modules — reducing manual administrative effort by 50%.
- Designed secure REST APIs and optimized relational schemas, improving average data retrieval speed by 40% and enhancing overall system responsiveness.

Software Engineer

July 2025 – March 2026

T-Works

Hyderabad, India

- Engineered scalable backend systems with customized analytics dashboards, cloud-based asset pipelines (DigitalOcean Spaces), and token-based authentication, supporting rapid user growth.
- Designed robust database schemas, optimized complex SQL queries, and executed schema migrations — reducing query execution time by 45% under increasing load.
- Hardened application security with Helmet and bcrypt middleware while contributing to CI/CD pipelines, resulting in 40% fewer security-related incidents and smoother production deployments.

PROJECTS

Full-Stack Academic & Project Management System

- **Backend Engineering & Database Architecture:** Designed and implemented a robust Express.js backend integrated with MySQL to securely manage complex relational data for tasks, subtasks, and role-based user access.
- **Timeline & Progress Tracking:** Built hierarchical API endpoints mapping `timeline_tasks` to multi-row `timeline_subtasks`, enabling real-time phase completion tracking via transactional SQL updates.
- **Data Validation & Security:** Implemented rigorous server-side validation, state normalization (date formatting, string trimming), and fully parameterized queries to eliminate SQL Injection risks.
- **Scalable API Design:** Delivered clean RESTful CRUD APIs with comprehensive error handling, custom HTTP status responses, and optimized multi-table interactions for production readiness.

EDUCATION

B.Tech in Computer Science and Engineering

DNR College of Engineering and Technology, JNTUK

Graduated: 2025

Percentage: 70%
